

DEV CODES

Full-Stack Web & Backend Developer

Nigeria • Lagos / Abuja • Open to internships, junior roles & freelance work

GitHub: github.com/devcodes **Portfolio:** devcodes.dev **Email:** hello@devcodes.dev

LinkedIn: linkedin.com/in/devcodes **Phone:** +234 XXX XXX XXXX

PROFILE

Developer focused on building practical, production-minded web applications, APIs and developer tools. Strongest at the frontend/backend boundary: React interfaces, Node.js/Express APIs, databases, third-party integrations and n8n automation. Comfortable taking a product from an idea to a deployed working system, with a strong bias toward clean UX, simple architecture and shipping.

CORE STACK

Frontend	React, TypeScript, JavaScript, CSS, Vite, responsive UI, API integration
Backend	Node.js, Express, REST APIs, authentication, middleware, validation, integrations
Data	PostgreSQL, Neon, Firebase / Realtime Database, JSON / JSONB
Automation	n8n, webhooks, scheduled workflows, email automation, API orchestration
Deployment	Vercel, Render, Cloudflare Pages, Cloudflare services, Git/GitHub
Additional	Python fundamentals, AI/API integrations, third-party SDKs

SELECTED PROJECTS

Error404Apis — Developer API Platform

Full-stack / API platform

- Built a developer-focused API catalogue designed to make common app features easy to integrate through simple endpoints and documentation.
- Implemented a Vite frontend with a Node.js backend, health endpoints, CORS handling and same-domain API routing/proxy architecture.
- Deployed the frontend on Cloudflare Pages and backend on Render, prioritizing a lightweight developer experience and fast API responses.

TaskBridge — Task & Reward Platform

Full-stack product

- Designed a task/reward marketplace connecting advertisers with users completing online tasks.
- Built backend flows around PostgreSQL/Neon, email verification, task categories, proof configuration and API-driven workflows.
- Integrated n8n for waitlist and promotional email automation and planned payment infrastructure with Paystack.

Sudo — AI Vibe-Coding Environment

AI developer tooling

- Building an AI coding environment for generating Node.js backends/APIs using sandboxed development environments.
- Designed a two-panel workflow with chat, file/editor views, logs, endpoints and expandable planning steps.
- Implemented project state with Neon and sandbox orchestration, with support for multiple model/API providers.

Reelix — Movie & TV App

Product / API integration

- Developed a movie and TV application backed by TMDB and third-party media APIs, with caching and fallback strategies.
- Worked on API integration, search, media playback architecture, downloads and performance-oriented UX.

TECHNICAL STRENGTHS

- Product-minded development — turns rough ideas into usable interfaces and working backend systems.
- API architecture — REST endpoints, third-party integrations, authentication flows, webhooks and service orchestration.
- Frontend engineering — responsive React interfaces with attention to hierarchy, interaction and performance.
- Automation — n8n workflows for emails, scheduled jobs, webhooks and multi-service processes.
- Deployment & debugging — comfortable diagnosing CORS, environment variables, hosting, API routing and runtime issues.
- AI integration — practical experience connecting applications to different model providers and building AI-assisted developer workflows.

EDUCATION

Secondary Education / SS3 Science — Nigeria • 2026

Self-directed software development alongside academic studies, focused on web development, backend systems and product building.

EXPERIENCE

Software Development Intern — Abuja | 3-month internship, 2026

Hands-on industry experience focused on software and technology development. Update this section with the company name, exact dates and measurable responsibilities after completion.

NOTES FOR FINAL APPLICATION VERSION

Replace placeholder contact details with your real links. Add GitHub repositories, portfolio URL, verified certifications, hackathons/awards and measurable project outcomes where available.

References available on request.
